MOVEMENT COLLECTION

Akita Epson Factory

Epson's sprits come from the **World First Quartz Watch** that was launched in 1969. After launching it, Epson has developed a lot of world first products. Epson is always trying to create something new and always keeping one step ahead of the others.

Seiko Epson Corporation Shiojiri Plant

Automatic Assembly Line

Our movements are produced on automatic assembly lines to ensure high quality and high efficiency. We support our customers' ideal watchmaking with high quality movements.

Sustainability

To achieve sustainability and enrich communities together with our customers and partners, we are practicing sustainability management to fulfill our social responsibility and create shared social value.

SOLAR COLLECTION

Convert light power into electric power

Epson solar movement is committed to sustainable energy as a concept and contributes to the care of the earth. At the same time, in response to the different needs of customers, we produce a wide and deep product series.

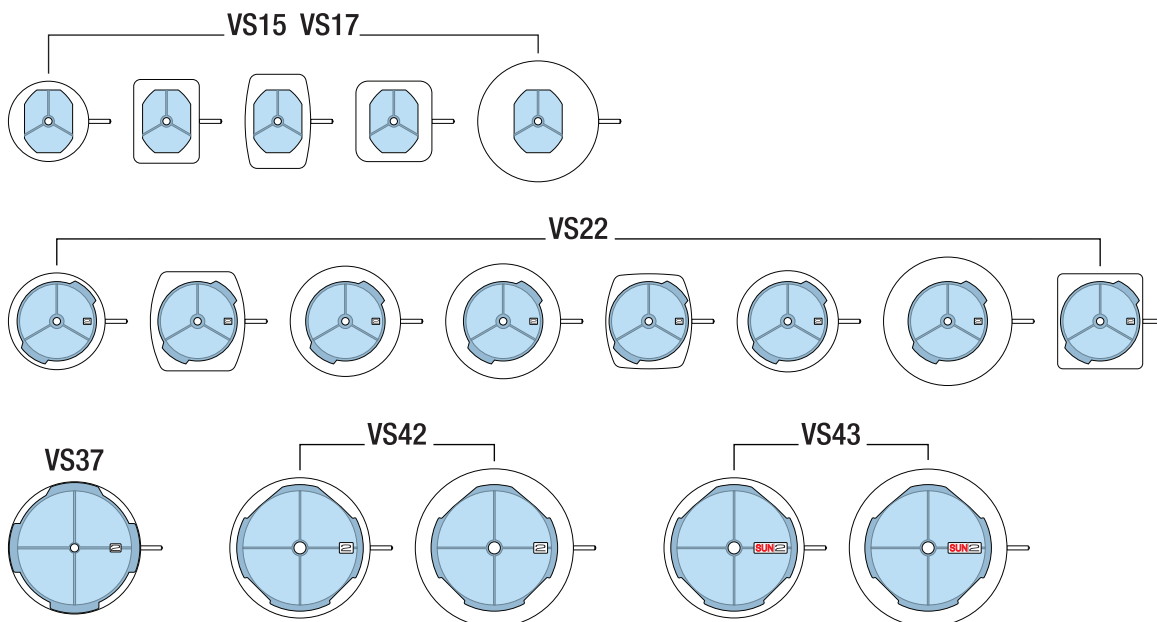

AS Series - Provide highly competitive mainstream products.

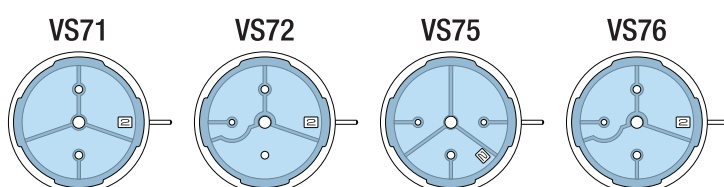

VS5 Series, VR4 Chronograph - Take muscle movement as the core. The movement has the function of displaying the power storage level. Meantime, we provide competitive timing products.

VS Series - With higher specifications, it is an advanced mainstream product that optimizes the performance of movement size, thickness & power storage.

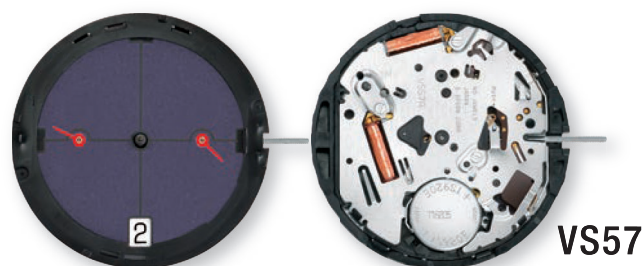

VS7 Chronograph - Improve the performance of functions and power storage, and meet the customer needs for advanced timing products.
